# TP-Link Deco - X58-4G Set Up Instructions

### 1. Download the TP-Link Deco app

- When you open the box the first step will tell you to download the TP-Link Deco app (please note, at this stage you should NOT power on the Deco unit).
- You should use your preferred/regular mobile phone or tablet to download the TP-Link Deco App from either the Google Play or Apple App stores.
- Once installed, the Deco app will appear on your device as 'Deco'. Open the app to begin the set-up process.
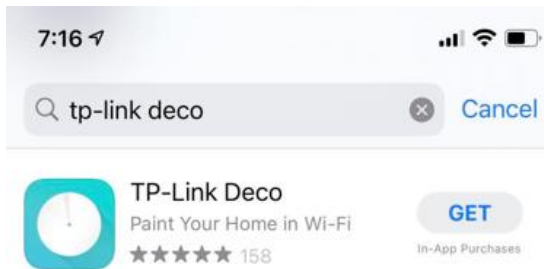

### 2. Log into the Deco App

- When you first open the app you'll be met with a login screen. If you're a new user, you'll need to create a TP Link username and password via the Sign Up button.
- It's recommended you use your preferred email address and a password that you can remember in case you ever need to reinstall the app.

### 3. After logging in tap "Let's Begin"

How do you want to use your product?

4G/5G Router

Wi-Fi Router

I want to use both

Deco     Nano SIM Card

Power Adapter

What you'll need

Get these items ready before you start. You'll only need one Deco for now. More can be set up later.

NEXT

Note: There may already be a SIM card inserted into your Deco from your service provider.
**7. Insert the SIM card into the Deco if you haven't done so already, then tap on Next**

Insert the SIM Card

Push the SIM card into the slot until you hear a click.

Do not connect your Deco to a router/modem/Ethernet outlet during the setup.

Next

Note: If there's already a SIM card inserted, skip this step.

**8. Position the Deco X58-4G near a window and power outlet, then tap on Next**

Position your Deco

Place your Deco in an open area near a window and power outlet. Look for a location where it can receive a strong 4G signal. For best signal try windows on different sides of the house.

Next

**9. Swiping the picture on the app will show where you shouldn't position the Deco X58-4G**

Position your Deco

Place your Deco in an open area near a window and power outlet. Look for a location where it can receive a strong 4G signal. For best signal try windows on different sides of the house.
